The AP-GfK Poll August, 2012

Conducted by GfK Roper Public Affairs & Corporate Communications

A telephone survey of the American general population (ages 18+)

Interview dates: August 16– 20, 2012

Number of interviews: 1,006

Margin of error for the total sample: +/- 3.9 percentage points at the 95% confidence level

NOTE: All results show percentages among all respondents, unless otherwise labeled.

Please refer to the exact sample number at the bottom of each table.

All results shown are percentages unless otherwise labeled.

AP-GfK Poll Methodology

The **Associated Press-GfK Poll** was conducted August 16 – 20, 2012 by GfK Roper Public Affairs & Corporate Communications – a division of GfK Custom Research North America. This telephone poll is based on a nationally-representative probability sample of 1,006 general population adults age 18 or older.

Interviews were conducted with 604 respondents on landlines and 402 respondents on cellular telephones. Both the landline and cell phone samples were provided by Survey Sampling International. The sample included the contiguous 48 states, Alaska, and Hawaii. Interviews were conducted in both English and Spanish, depending on respondent preference.

The combined landline and cell phone data were weighted to account for probabilities of selection, as well as age, sex, education and race, using targets from the March 2009 supplement of the Current Population Survey. In addition to these factors, the weighting takes into account the patterns of land and cell phone usage by region from the 2009 Fall estimates provided by GfK MRI Inc.

The margin of sampling error is plus or minus 3.9 percentage points at the 95% confidence level, for results based on the entire sample of adults. The margin of sampling error is higher and varies for results based on sub-samples. In our reporting of the findings, percentage points are rounded off to the nearest whole number. As a result, percentages in a given table column may total slightly higher or lower than 100%. In questions that permit multiple responses, columns may total significantly more than 100%, depending on the number of different responses offered by each respondent.

Trend data are displayed for selected questions from previous AP-GfK Polls that also consisted of telephone interviews with nationally-representative probability samples of adults age 18 or older. Details about all AP-GfK Polls are available at <http://www.ap-gfkipoll.com>.
