SSTAX1. As you may know, last year, the federal government passed a law temporarily reducing Social Security payroll taxes. Congress is currently considering renewing this tax reduction. Should Congress (vote to continue this payroll tax reduction even though it may increase the federal budget deficit) or (allow this payroll tax reduction to expire even though it would cause most workers to take home less money in their paychecks)?

## AP-GfK Poll Methodology

The **Associated Press-GfK Poll** was conducted December 8 - 12, 2011, by GfK Roper Public Affairs & Corporate Communications – a division of GfK Custom Research North America. This telephone poll is based on a nationally-representative probability sample of 1,000 general population adults age 18 or older.

Interviews were conducted with 700 respondents on landlines and 300 respondents on cellular telephones. Both the landline and cell phone samples were provided by Survey Sampling International. The sample included the contiguous 48 states, Alaska, and Hawaii. Interviews were conducted in both English and Spanish, depending on respondent preference.

The combined landline and cell phone data were weighted to account for probabilities of selection, as well as age, sex, education and race, using targets from the March 2009 supplement of the Current Population Survey. In addition to these factors, the weighting takes into account the patterns of land and cell phone usage by region from the 2009 Fall estimates provided by GfK MRI Inc.

The margin of sampling error is plus or minus 4.0 percentage points at the 95% confidence level, for results based on the entire sample of adults. The margin of sampling error is higher and varies for results based on sub-samples. In our reporting of the findings, percentage points are rounded off to the nearest whole number. As a result, percentages in a given table column may total slightly higher or lower than 100%. In questions that permit multiple responses, columns may total significantly more than 100%, depending on the number of different responses offered by each respondent.

Trend data are displayed for selected questions from previous AP-GfK Polls that also consisted of telephone interviews with nationally-representative probability samples of adults age 18 or older. Details about all AP-GfK Polls are available at <http://www.ap-gfcpoll.com>.
