THE AP-GfK POLL
April, 2015

Conducted by GfK Public Affairs & Corporate Communications

A survey of the American general population (ages 18+)
Interview dates: April 23-April 27, 2015
Number of interviews, adults: 1,077

Margin of error for the total sample: +/- 3.4 percentage points at the 95% confidence level

NOTE: All results show percentages among all respondents, unless otherwise labeled.
Please refer to the exact sample number at the bottom of each table.

*Beginning in October, 2013, AP-GfK polls were conducted online using GfK's nationally representative KnowledgePanel. All prior trend conducted by telephone.
For more information, see http://www.ap-gfkpoll.com.

CUR1-HCEMAIL4 previously released.

B1a/b/ba.   How would you describe the nation's economy these days….

[IF "NEITHER" OR REFUSED/NOT ANSWERED] If you had to choose, do you lean more towards the nation's economy being good or the nation's economy being poor? [NOTE: BEGINNING IN DECEMBER, 2013, RESPONDENTS WHO DECLINE TO LEAN ARE SHOWN THIS QUESTION AGAIN INCLUDING A "DO NOT LEAN EITHER WAY" RESPONSE OPTION]

AP-GfK Poll Methodology

The **Associated Press-GfK Poll** was conducted April 23 to April 27, 2015 by GfK Public Affairs & Corporate Communications – a division of GfK Custom Research North America. This poll is based on a nationally-representative probability sample of 1,077 general population adults age 18 or older.

The survey was conducted using the web-enabled KnowledgePanel®, a probability-based panel designed to be representative of the U.S. population. At inception participants were chosen scientifically by a random selection of telephone numbers and since 2009 through Address-based sampling using the post office's delivery sequence file. Persons in these households are then invited to join and participate in the web-enabled KnowledgePanel®. For those who agree to participate, but do not already have Internet access, GfK provides at no cost a laptop and ISP connection. People who already have computers and Internet services are permitted to participate using their own equipment. Panelists then receive unique log-in information for accessing surveys online, and then are sent emails throughout each month inviting them to participate in research.

The data were weighted to account for probabilities of selection, as well as age within sex, education, race, and phone type. The phone type targets came from the fall, 2012 MRI Consumer Survey. The other targets came from the March, 2012 Supplement of the Current Population Survey.

The margin of sampling error is plus or minus 3.4 percentage points at the 95% confidence level, for results based on the entire sample of adults. The margin of sampling error is higher and varies for results based on sub-samples. In our reporting of the findings, percentage points are rounded off to the nearest whole number. As a result, percentages in a given table column may total slightly higher or lower than 100%. In questions that permit multiple responses, columns may total significantly more than 100%, depending on the number of different responses offered by each respondent. The cooperation rate for this poll was 48%.

Trend data are displayed for selected questions from previous AP-GfK Polls that were conducted using telephone interviews with nationally-representative probability samples of adults age 18 or older. Details about all AP-GfK Polls are available at http://www.ap-gfkpoll.com.
