

The AP-Petside.com Poll

Conducted by GfK Roper Public Affairs & Corporate Communications

Interview dates: October 13 – October 17, 2011:
Interviews: 1,118 pet owners

Margin of error: +/- 3.6 percentage points at the 95% confidence level

NOTE: All results show percentages among all pet owners interviewed otherwise labeled.

Please refer to the exact sample number at the bottom of each table.

All results shown are percentages unless otherwise labeled.

NOTE: ALL QUESTIONS ASKED OF PET OWNERS ONLY.

PET2. Please tell me what pets you have in your household, like dogs, cats, birds, fish, and other kinds of animals.

[DO NOT READ LIST ONLY IF NECESSARY. MARK ALL THAT APPLY]

PET17A. If there were a twenty five dollar fee involved in surrendering a pet to a shelter, would that make you more likely, less likely, or neither more nor less likely to surrender a pet to a shelter?

[IF MORE LIKELY:] Would that be much more likely or only a little more likely? [IF LESS LIKELY:] Would that be much less likely or only a little less likely?

AP-Petside.com Poll Methodology

The **Associated Press-Petside.com Poll** was conducted October 13-17, 2011, by GfK Roper Public Affairs & Corporate Communications – a division of GfK Custom Research North America. This telephone poll is based on a nationally-representative probability sample of 1,118 pet owners age 18 or older.

The interviews were conducted with respondents on landlines and on cellular telephones. Both the landline and cell phone samples were provided by Survey Sampling International. The sample included the contiguous 48 states, Alaska, and Hawaii. Interviews were conducted in both English and Spanish, depending on respondent preference.

The combined landline and cell phone data were weighted to account for probabilities of selection, as well as age, sex, education and race, using targets from the March 2009 supplement of the Current Population Survey. In addition to these factors, the weighting takes into account the patterns of land and cell phone usage by region from the 2009 Fall estimates provided by Mediamark Research Inc.

The margin of sampling error is plus or minus 3.6 percentage points at the 95% confidence level, for results based on the entire sample of adults. The margin of sampling error is higher and varies for results based on sub-samples. In our reporting of the findings, percentage points are rounded off to the nearest whole number. As a result, percentages in a given table column may total slightly higher or lower than 100%. In questions that permit multiple responses, columns may total significantly more than 100%, depending on the number of different responses offered by each respondent.

Trend data are displayed for selected questions from previous AP-Petside.com Polls that also consisted of telephone interviews with nationally-representative probability samples of pet owners age 18 or older.

Details about all AP-GfK Polls are available at http://www.ap-gfkpoll.com.
